

GLAMPING & HOUSE

PRESENTATION

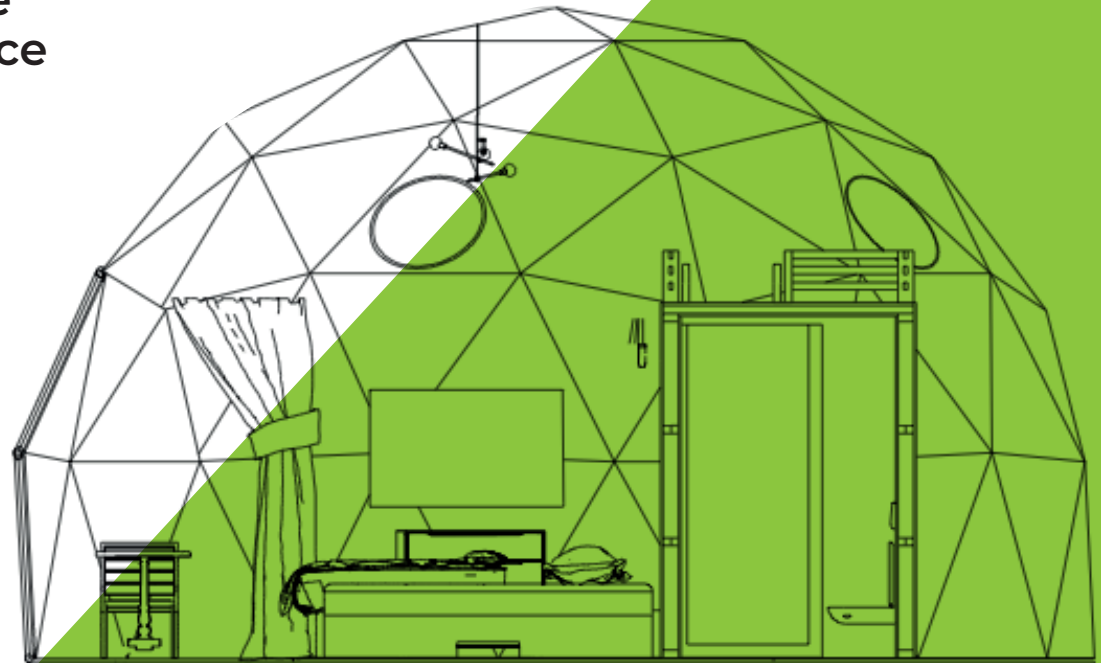

GLAMPING
& HOUSE

What is GLAMPING?

Glamping is a new type of tourism that being far from the noise of the city gives the impression, experience and pleasant feelings in nature.

Although tourists are immersed in nature, they prefer to stay away from difficult conditions, love luxury and comfort lifestyle. In addition to being close to nature, they need to spend this time in peace.

GLAMPING
& HOUSE

ABOUT

The “Glamping&House” hotel project is going to be implemented for the first time in Azerbaijan. The main aim of the project is to offer a new type of recreation for tourists without harming nature. In addition, besides implementing the “Glamping&House” hotel project, our company will also supply production materials and deals with the construction of these houses.

Furthermore, the project is of great importance for our country, because these eco-houses are:

COMFORTABLE

In eco-houses, everything is provided for guests` comfort: Wi-Fi, air conditioning, bathroom, kitchen, terrace, etc. Also, it is planned to build a shopping centre, restaurant and conference hall in the project area

ENVIRONMENTALLY FRIENDLY

No excavation or construction is allowed in the project area. Additionally, these houses are made entirely of eco-friendly materials. One of the positive aspects is that it is planned to provide electricity through solar panels.

MODERN

While entering the hotel area controlled by a smart system, a special device will be presented to guests. In this way, everything in the room is to be controlled by that device: lighting, air conditioning, bathroom, etc.

COMPLETELY SAFE

All safety measures are taken into account in eco-houses. It is planned to install fire extinguishers and alarm systems in each house. Also, the smart system installed in the houses has the ability to transmit data to the center in a timely manner in any force majeure situation.

Difference between traditional camping and Glamping:

Traditional camping

Sleeping bag

Not being able to take a shower

Canned food

Flashlight

Glamping

Cozy bedroom

Luxurious bathroom

Restaurant and bar

Lighting system and internet

Geo-houses designed for your comfort:

Within the project, eco-houses will be installed in the geo-dome model, also called as geo-houses.

We can build geo-houses in incredible areas: in the mountains, near lakes, in the depths of forests, etc. As they are safe, their model and structures are suitable for such conditions. Thus, tourists will be able to spend time in a comfort and enjoy the fresh air.

Features of Geo-houses

Endurance

Geo-houses are weather-resistant from -70 degrees to +50 degrees.

Available in any size

Geo-houses can be made in any size - they can be installed in small or large sizes.

Quick to build

Little time is spent on the construction of geo-houses.

GLAMPING
& HOUSE

Creative design

The dome model is used in the structure of geo-houses. The material is made of a metal frame and PVC tent. It is possible to make additional changes in the design: doors, windows on both sides, etc.

Stunning panoramic view

One of the main reasons for making geo-houses in the dome model is to create conditions for a comprehensive nature view from the houses.

Due to this structure, guests can easily see the beauty of the environment even when they are at home.

Durability

Depending on the conditions and the location, geo-houses can be used for 15 years or more. As the carcass is dome-shaped, the weight is evenly distributed on each side, makes it more durable. In this way, bulwarks are not used in their construction, and you have more space in the house to relax.

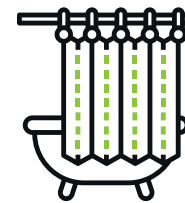

Modular constructions

It is possible to build several geo-houses close to one another and put a passage between them. Thus, we can place guests in large groups close to one another.

Comfortable conditions

It is wonderful to be in harmony with nature and relax in the fresh air, but comfortable conditions and hygiene are very important as well.

The main feature that makes geo-houses special is the presence of comfortable toilets and bathrooms. Thus, you will relax both by enjoying the beauty of nature and greenery, and you will not lag in comfort by following the rules of hygiene.
